

```

/*
 * Stylesheet to define font size and layout elements for the Generic Interim Report.
 * Properties defined in this stylesheet may only be modified. Removing properties will cause the report to Error or function incorrectly.
 *
 * Properties and correct syntax guide:
 *
 * height:                100pt;          (In Points (pt). Typically used for defining max height of an embedded image)
 * width:                 100pt;          (In Points (pt). Typically used for defining max width of an embedded image)
 * padding-top:           5pt;            (In Points (pt). Typically used for defining the top padding of content such as table content)
 * padding-bottom:        5pt;            (In Points (pt). Typically used for defining the bottom padding of content such as table
 *                               content)
 * padding-left:          5pt;            (In Points (pt). Typically used for defining the left padding of content such as table content)
 * padding-right:         5pt;            (In Points (pt). Typically used for defining the right padding of content such as table
 *                               content)
 * font-size:             10pt;           (In Points (pt). Size of font)
 * font-weight:           bold;           (Defined as text. Font Weight (normal or bold))
 * font-style:            italic;         (Can be used to force text to print in italics (italic, strikethru, underline))
 * font:                  Arial;          (Defined as Text. Case sensitive Font Name)
 * color:                 #000000;        (Color in HEX. Color of Font)
 * background-color:      #CCCCCC;        (Color in HEX. Color of background. Typically used for Table background colors).
 * display:               inline;         (Used to hide certain style items from printing on the report (none or inline).
 * valign:                middle;         (used to align elements vertically in a table structure (top, middle, bottom)
 * min-height:            20pt;           (In Points (pt). Used to define the row height for all rows in a table)
 * width:                 50%;            (Used to control the amount of horizontal page space a certain column may use in a
 *                               relative percentage value)
 * content:                "User defined text" (The content tags can be used to place additional wording on the page. If not required
 *                               leave empty quotes).
 *
 * Each Style items properties are defined between the open and close curly brackets.
